

# BABYMOBILES BY THE NUMBERS

The BabyMobile program aims to **remove the transportation barrier** many Oklahoman's face. Diapers, formula, and food are distributed in the parking lot at partner agencies across Central Oklahoma.

*(Statistics are from April 1, 2019 - March 31, 2020)*

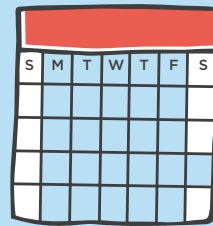

The **BabyMobiles** visited **69 locations** in **17 counties**. **Eight** of these counties were **new**.

 = new counties

The BabyMobiles made **311 total visits**. That's an average of **26 stops per month!**

## Client Story

Many of our clients don't have access to reliable transportation. Raegan, pictured above, is one of those clients. Her mom is working towards her degree in Logan county, and often **relies on family for transportation**.

Raegan's mother was able to **conveniently visit our location in Guthrie** when she needed help with diapers.

## THE RESULTS

At the end of the year, the BabyMobiles had served **6,958 babies and toddlers**. **3,428** of those clients (**49%**) were new to Infant Crisis Services. Thousands of **babies and toddlers now have full tummies and dry diapers** because the BabyMobiles were on the road.

**Infant Crisis Services**  
Serving babies and toddlers since 1984
